HAIL AND ELECTRICITY.

You Type of Destroyer Being Tries

A new type of half destroyer is being seated in France on a large scale, says a consultar report. The device is essentially a very large lightning rod of pury copper, grounded by means of a copper conductor. According to the theory of the inventors, these instruments, by their conductors, According to the theory of the inventors, these instruments, by their conductors, According to the theory of the inventors, these instruments, by their conductors, according to the theory of the inventors, there is no the conductors, according to the theory of the inventors, and the conductors and Deputies, is studying the process and has encouraged experiments to be undertaken, a chain of half destroyers of the new type, will be established in important rine-growing districts, which herefore have suffered heavily from halistorms, notably in the Dupartment of the Ol-roade, the Beaujolais, the Loire Information of the Chronic, the Beaujolais, the Loire Information of the Chronic to the Chronic to the Sangiolais, the Loire Information of the Chronic to the Sangiolais, the Loire Information of the Chronic to the Sangiolais, the Loire Information of the Chronic to the Sangiolais, the Loire Information of the Chronic to the Sangiolais, the Loire Information of the Chronic to the sangiolais of the Chronic Information of the Chronic to the Sangiolais of the city. The great damage wrought by hall and lightning in France each year, with lassess satimated at approximately 20,000,000 to 2
